

Pictalk for families

Visual planning and communication in AAC

Pay what you want!

Greater autonomy. Less stress on a daily basis.

Simple and visual tools designed with and for people with disabilities and their caregivers. Created by a family, for families.

Agenda

Tasks

Notebooks

Communication

Sound familiar?

Meltdowns

Getting ready for the day takes twice as long as expected.

Anxiety about change

Any change of plan is potentially a crisis situation.

Communication barriers

Your child has difficulty communicating.

Lack of autonomy

You have to be present at every stage, otherwise nothing gets done.

"He now follows his hygiene routines without complaining. It has completely changed our mornings."

Lucrezia, mother
